

Saves costs. Increases productivity.

The catalyst for targeted knowledge in your organization

The Smart Knowledge Hub lets you quickly publish content, such as training videos, how to videos, brief information, technical documents, and any kind of knowledge nuggets. These are available to employees fast and effectively:

- Online via web or mobile devices
- Anywhere and anytime
- Relevant results supported by artificial intelligence, cognitive Search and SmartCodes.
- Playlists and e-learning save training costs and accelerate learning and adoption

As a stand-alone solution or as a complement to existing knowledge sources and learning systems.

- Learning ad-hoc and work-integrated- Videos, PDFs, documents, links and much more
- Platform-independent- Azure-based- Standalone or integrated into system landscape.
- Set up and live in just a few hours
- Connection to all content sources- Integrated reporting and analysis tool.

The Smart Knowledge Hub is particularly suitable for employees who are often on the road and are in need of a fast and easy access to impactful knowledge helping them to increase their job performance. Typical application areas are:

- in technical field service on product and process information
- in B2B sales
- in the provision of services where knowledge is required
- onboarding into the company or adoption and enabling of new solutions
- and many other work-related learning topics.
